Mitchel Nov 4th 1863

Cold dash ^{to cure}
a drunken man of water
" " " " "

Does Alcohol enter
the blood. It - Does enter
the blood - It produces
congestion of the brain -
It gets into the brain through
the blood - It is the poison
of the Alcohol that produces
the effect.

Alcohol is an antedote
for the poisons of Insects
and venomous serpents
i.e. give it to them untill
they get dead drunk -

i.e. to those that are not
in the habit of using it -

Onion for to extract the
urine of a child Mash
two or three and apply
them to the abdomen
in the form of a fomentice

Garlick
 pound the garlick
 into a pulp and apply
 sugar. Give these for
 a child a piece as
 long as Nutmeg two
 or three times a day

A Deafness

Take a garlick
 and heat it - and
 wrap it in a rag
 and put it in the
 ear and leave it
 in all night

for sting of a bee take
 a garlick or onion
 and apply to the part
 stung

Transmitted Syphilis or
Infantile Syphilis—

Usually find copper colored
spots on the skin, the child
looks shivered appearance

If the woman is tainted

give the woman Iodid of
Potassium & Chlorid of mercury

Civilisation Eradicate
the disease by Inoculation
Inoculate the thigh with

(161)

Matter from a Shanker
But, don't do it for your
patient may take you for
Damage — — Gross —

Wounds

It may be made by almost
anything, - Insized wound.
How must such a wound be
managed 1st See to the Hem-
orrhage - Then remove all
the foren. Matter or foren
Substance - If there is any
hair it must be removed
Dressing - Adhesive plaster
and Sutures - Compresses and
bandages. The plaster should
be cut in direction of its length

December 3^d 1863

apply the 1st Strip across
the center of the wound—
leave places for drainage—
leave the Strips on until
they become painful—Two
or three days—

// Colloids — It may be
applied in wounds of the
neck or where there is a great
dilatation of the skin

E. Wallace - Friday Dec. 3^d 1863

Inflammation of the Unimpreg-
nated Uterus. — It is not
likely to be confined in one
place Generally depends on the menses
apply Nitrate of Silver

Systens Sensitiveness pain from
(58)

the distention of the Bladder
 pain in motion - very little disch-
 arge Swelling - Nausea - Great
 Nausea - pain without motion
 Increased pain with motion
 quick pulse coated tongue
 loss of appetite distress about
 the mammae -

Treatment abundant appli-
 cation of leeches upon the
 perineum & above the pubis
 Dover's powder & Calomel -
 Sedlitz powder - Epsom Salts -
 use S'adam's Injections
 after the Cathartics - if there
 be much dryness pass a
 little lard into the vagina

{Acute}
{Chronic} M. trachitis 1863

Give the patient - very
light Diet - Keep her
perfectly still until she
is all right

Will uneasy aching pain
in the epigastrium -

You will sometimes feel the
uterus enlarged through
the Abdomen - retroversion
of the uterus sometimes
that the rectum have some
drawing upon the Bladder
pus & mucus secreted and
Blood thrown out
puffy pale salid looking
face dyspnoea from
the disorder

Hospital Clinic Saturday Dec. 4th

1st Case - Anurism of Artery -
Death from Convulsions
or from bursting of the
Anurism. - Treatment -

(Sugar of lead) Take a little Blood -
Digitalis Veratrum Verida - All
that you can do is to make your
patient comfortable - perfect rest -
to the patient -

Case 2nd Dullness over the right
lung - Generally catch a bad
cold - (Pneumonia) - Rusty colored
^{cannot lay on the side}
Expectoration - Treatment -

Counter Irritation Cupping
Mucousals & Antimonials
Weak Diet perfect rest -

Continued

Apply over the chest turpentine
all over the chest Blisters
if the patient is pulse wine whey
But feel your way - In the first
place overcome the inflammation
Dulness upon percussion — — —

Surgical Clinic Dec. 4th 1863

1st Case - Inflammation of the knee
and dead Bone - Necrosis of the
femur - make a free incision
Dress with warm water

2nd Case - Dislocation of the
of the Shoulder - Replace it by
putting the heel in the axilla
and take hold of the arm and
draw it in and then secure
it with bandage

581

3rd Case - Fistula in ano

The patient sometimes has a cough The Bowls are locked up for 3 or 4 days

Pass a director up the sinus and take a bistoury and cut the Sphincter up the director and apply caustic potash

4th Case - Compound fracture of the Fibula and Tibia and wound - Place it in the Bran dressing - Take a fracture Box take some muslin into it to keep the bran in - Remove the Bran that has pus in it every day and put in fresh - use Wheat Bran

(78)

Wallace Dec. 4th 1868

lime water & oil for reaching
of the vulva. —

Coe's ²⁴ ~~Spermatorhac~~, local Back-

Treatment Evacuate the bowels

Camphor 10 or 15 grs. every
day - Camphor pad above

Gross-Clinic Dec. 4th
Apply the tincture of
Iodine on the surface
absolute rest

Key per tri by of the
Tongue - little girl

I saw a Menstruating
uterus today - Dec. 5th 1863

Dec. 7th 1863 Monday
Dickson - Typhoid Fever
It belong to a very large
group of diseases -
ulceration of the Intestine
is a very prominent
symptom - The symptoms
are very clearly

~~intecited~~ - Sense of
Sorrow and depression
 is one of the symptoms
Chilliness which will
 last perhaps a whole
 day - Nausea - The Tongue
 is swollen furrowed
thinly towards the End
Thick at the Back
 The skin of the Head puls
tight - the patient is
 anxious to go home Silent
pulse is somewhat smaller
 and quicker - In some corded
 Sometimes an Intermission
 Hand feet and nose cool
 irregularity of the Heat

(Dickson) (continued)

on the surface of the body -
This is the condition you
find the patient the 1st
week? - Disturbance of
the bowels - Distention of
the Stomach - Diarrhea
at the end of the 1st week
or beginning of the 2nd you
will see red spots on
the surface - you can
obliterate these spots -
They disappear very soon others
come - Patients may die without
the spots - Negros never have
the spots 2nd week you
have the tongue more
thickly coated

ALL

you may have hemorrhage
from the nose The tongue
dry - Sordes around the
teeth Dark matter -

you will find it around
the lips and edge of the
tongue - The patient is
restless talking and
muttering to himself some-
times dull and heavy -

The Bowels become more and
more irritated by Diarrhea
Submucous matter in the upper
portion of the Intestine -

Air tumors in different parts
of the body - a particular spot
in the belly becomes painful

(Dietson Continued)

Scarcely is the usual mode
of death - He may die
from putrefaction - or coma

The Stomach is almost always
disturbed - The gland or inflamed
The glands of Peyer are swelled
and, inflamed ulcerated
ulceration of the mucous
membran of the Stomach

Gross - Surgery
(Dressing Wounds -)

Dressing by Suture

The interrupted Suture you
should be careful that it
is not too large - The Suture
should be well waxed
The needle should be

4541

curved. Care should be taken
 that the needle does not go
 through any blood vessel or
 nerve or muscle - we do not
 tie any until they are all
 in and then tie the small one
 first - tie them gently but
 firmly - Then take adhesive
 plaster and apply it over the cut
 to keep it from gaping let
 them remain as long as neces-
 sary - two or 3 days or more -
 When ever you can use the Iron
 use it it is better than silk
 It does irritate the parts -
 Twisted or hairly suture
 In making the twisted

Suture take the pin and
pass it through the part
and then take a thread
and pass it and pass
it elliptically and then
in order to support
the interval pass the sutu-
res from one to the other
Then cut off the ends of
the pins - constitutes a
very nice dressing - take
out the first pin at
the end of 36 hours
the next at the end
of 24 hours after - they
may be left 3 or 4
Days

1871

The grill suture is
seldom employed in
the present day -

In deep wounds we must
apply compresses on the
opposite sides held there
by a roller to make it
heal from the bottom
place the parts at rest
and if possible in an
elevated position and in
a relaxed position.

Little or no local treatment
is necessary. ~~If over active~~
regulate the Diet avoid
action for ^{several} ^{days}
of Union in the present

1 by direct ^{union} adhesion

2

Union by the 1st =
in tenton slight
inflammation place

TLI

Pancoast Anatomy
Most of the muscles are
levers of the third order
Deltoid Muscle - Articular
muscles are 4 in number
Subscapular M - insiet of
Scapula insert on the
tuberosity of the humerus

Wallace Dec. 7th 1863.—
Subject—Inflammation of
the neck of the Uterus
In health it is smooth
a peculiar gummy feeling
nor is it painful to
the touch—Now when
diseased—The length
is greater width is greater
and thicker—It is a
very common disorder
arrest of the menses
Parturition—Sometimes
at cessation of Menstru-
ation we have Inflam-
ation We Have a host
of Causes

Fig 1

Symptoms ~~Acute~~ ²⁹ ~~uterine~~ ^{call}

Enlargement of the
tissue - you will find
the neck of the uterus
hard filled more or
less with lymph some
displacement of the womb
the women call it falling
of the womb - What

Does the uterine neck
look like when infla-
med - It looks very
red - secretions are
lymph and puss or
mucopuss - It annoys
the woman - after wiping
away the puss you will
find little stinging flakes

Throwing off time after
time first symptom is
that the os uteri is larger
than usual sometimes the
vagina will be inflamed
Take a sound and pass it
into the neck and if you
get blood there is inflammation
Under discharge of Starchy
Sticky mucus The ulceration
generally begins right at
the orifice of the uterus
generally both lips but
not equally - the moment
the cosine touches the ulcer
you will have a white color
These Ulcers do not often
erode - In addition
you will find the

Vains enlarged - what
discharges have you in
an ulcerated uterus -
but when pus is formed
ulceration is beginning
The discharges in ulceration
is purulent
If the woman tells you
that at every sexual
intercourse she has bleed-
ing - it is nothing but
ulceration of the uterus
Sometimes there is
much bleeding - wipe it
away and touch it
with caustic and as
soon as you get it touched
all over the bleeding
will stop

Dunghlison Dec. 7th 1863.
Reception of fresh matter
The Circulation was
discovered by Harvey
in 1619 - We have two
kinds an Arterial and
~~a~~ Venis all the blood
goes to the Lungs to be
Converted in to Arterial
blood and then passes
back to the heart and
passes out of the Aorta
to every part of the
System The blood passes
into the Coronary artery
during the contraction
of the right side (59%)

of the heart

Both sides of the heart
act together. They contract
together when

Pancoast

Tying the Subclavian
artery above the clavical
When you work

around the Artery.

The pulsation stops
Sometimes - If you
want to tie the

the artery near the
heart scis Sclenus
muscle and cut down
below. But it is a
very dangerous
operation as it gets
near the heart

The heart sympha-
thises greatly with
the arteries about the
neck when you can
avoid it dont tie it
Cut down to the artery
above the clavicle and
compress it with the
thumb and finger and
then cut in the axilla
and let out the clot
and tie both ends of
the artery there —

(891

Dr. Ellison Dec.

35

Treatment of Typhoid Fever

Eruptions in fevers are sometimes wanting - was struck with the Lesson - Cause - this whole group of disease occur together yet there is a difference - Typhus and Typhoid occur together - How are these fevers taken I think they are catching - filth carries with it Typhus fever - the coming together of the crew of a vessel that have been confined for a long time they are capable of giving fever - I believe that Typhoid fever is contagious

1691

Gross

At what period does a
Shankle obtain its hard
base - in 8 days - The bones
may remain - to get rid
of this put the patient
under mercury - apply
acid nitrate of mercury
or mercurial ointment
Get rid of the poison by
a mild mercurial treatment
Bubo - is an affection of
the lymphatic ganglia

There are several modes
by which wounds may heal
1 by the first intention

By granulation —

By a Secondary adhesion
a wound can not heal
without inflammation and
plastic matter

Punctured wounds Poisoned
wounds — They are inflicted
with a nail or anything
of that kind — It may
extend to any depth — They
are very painful — Seldom
attendant with any hemorha-
ge — It is liable to be followed
by Erysipelas — There is no
disposition to heal by
the first intention
Secondary affection
the parts are liable to
contraction

Gross Continued

How should such
a case be treated -
Get rid of the foreign
substance in the first
place cut down upon the
foreign substance and
remove it with your
forceps - Allay the pain
with Anæsthesia - apply
externally cloths wrung
out of warm water
medicated with opii
Make free Incisions for
the purpose of allaying
distention -

Support the
system with Anæsthesia

never allow Tetanus
to appear - Wounds
are sometimes lacerated
torn - a lacerated wound
seldom bleeds much -
It liable to be followed
by secondary hemorrhage
There is a sense of numbness
If a nerve be torn there
is but very little pain
When ever the patient
is in a violent shock
the blood coagulates
much sooner the muscu-
lar system is paralyzed
and does not act on
the blood vessels

Treatment of the Seasoned
Wound - Do the best you
can for it. Join of the
parts as nicely as possible
and tie the arteries and
bring the parts together
the same as I sized
Wound - Tepid water
Dressing medicated
by Opⁱ - Wounds are
sometimes Contused
bones may be crushed
Arteries torn and no
break of the skin -

What shall you do in such a case -
Treatment Stimulat this man
hold Ammonia near the nose
Dash cold water on (4-5)
Stimulating Injection

The patient lay the head
a little lower than the other
nests to throw a little blood
to the brain. —

#Black eye Cold water
containing a little salt or
vinegar or arnica—
let out the fluid

Dunghlison Dec: 8th 1868.

Circulation - Corpmainorechia

Pulmonic Heart sytnic

heart ~~the~~ heart contracts

both sides of the heart
contract at once - There

are two sounds to the heart

LS-51

Endocardial) Create ^{little} New letter

The heart beats with
increased force

Increase of heat is one
of the causes

Medical Clinic 9th 1863

1st Case Young woman
about 3 weeks ago she
was taken with flooding
and Dropsical infusion
had a miscarriage - pain
in the breast short of breath
difficulty in passing water
Urin is almost blood
red has blood in it

Considerable of swelling
all over the body - pitting
upon pressure

(7-51)

What is the cause
You will find more
or less disturbance of the
Pituitary - The uterus
is in a state of inversion
does not contract -

1st constitutionally
bandage around her
Iodide of Iron - wine
of Ergot - Myrrorica
Monsel Salt 23

2 oxides water

Inject the uterus with
Monsel Salt 23 take
a female syringe
What must

18-51

1st perfect rest
 Curls over the chest
 Cream of tartar in
 small doses - Tea of
 unanosa. Congestion
 of the Kidneys which
 produces Albumuria
2nd Case - Neuralgia
 what is the cause of it
 There are a great many causes
 The best remedy is Iodid
 of Potash when it comes from
 Cerebral taint. It is inflammation
 of a nerve - Commenced by leeches
 blisters dressing it with morphia
 Small Blisters - more or less
 irritation all the way down
 the spine - 1st perfect rest
 Croton oil

Quinine Arsenic
Give a hundred and sixty
pills made of Iron till
them not to come back
until they have taken
the whole - 1 gr. of Iron
in each pill - Sometimes
patients do well with
Opium

Belladonna
Aconite

Sometimes you can't
make any impression
Sometimes it does to
take out a piece of
the nerve

New born child.

You will find a kind
of grey look over the
child — — —

Inflammation of the uterus
Hypertrophy of the uterus
The cervix uteri - How
much may a uterine neck
enlarge it may be from
2 to 5 times its natural
size When you commence
treating it you will find
it grow larger - Some
times singularly long
wid and thick Sometimes
you will have one lip longer
than the other on the account

If one side being diseased
and not the other - There
is change of Position
It will press against
the rectum and produce
Inflammation of the rectum
Falling down of the
uterus is a very troublesome
thing - if the uterus is heal-
thy there will be no trouble
The upper part of the
vagina will sometimes
be present let it alone
cure the uterus - Sometimes
the vulva is affected
from the uterus - Cure
the uterus and that
will get well itching
of the vulva is a sign

of Inflammation of the
 Uterus - for that use
 lime water and oil
 Touch the os uteri with
 lunar caustic every 4-5 or
 6 days perhaps for a month
 Sometimes the Rectum may
 become involved discharge
 of pus and blood - Pain
 is rarely felt at the
 seat of the disease
 Sometimes the uterus
 will be very sensitive
 and sometimes not
 The pain will be
 in the small of the
 back and in the (681

(38) left overy it may
 be in both Ovary
 Pain in the Hypogast-
 ric region Pain in
 the Hips Pain under
 the ribs Pain high up
 in the back Headache
Functional Systems

 hastened some flow
 but not enough
 Sometimes to flooding
 Uterin Inertia

Philadelphia Dec
Typhoid fever #
Dickson Dec 10th 1863—

Examine your patients
carefully—No fever can be
cut short—In a mild case
give an emetic and cathartic
use ipecacuanha for Emetic
Give a mercurial Cathartic and
Caster oil after it—Examine the
abdomen and if you find tenderness
apply a few leeches early in the disease
Quinine in Typhoid fever after the
Stomach has been cleared out by
a cathartic and emetic
if you find Quinine not
well borne your patient
will bear Chinchonina
with Spirits of Nitre (L&L)

of 288 ————— 1846 61

for the Diarrhea use Tannin
warm application to the
belly continually. —

Examine the condition
of the bladder — use the acids
continually

mineral Salts Hydra-Cornueta
mild Salines — Mineral acids
Continuous nourishment

Hydrochloric-acid 20 drops
every two hours beef tea

Frost fevers ulceration of
the Intestines comes by
starvation Don't carry the
nourishment to far — Turpentine
is good in a red dry
tongue — Veratrum viride

E. A. Sante

Dickson Continued

Dec. 14th Monday 1863

after a cathartic

An emetic will relieve the
Disease Antimonial or ipecac
uanna - I would rather take
my chance without purgatives
Select out of all the methods
the best for the case you are
treating - abstract light from
the patient - Mild cathartic
mucous Cathartic & Emetic
ipecac Hydrochloric acid
If the pulse is above one
hundred give the Antimonial
Emetic - Keep the head cool
Veratrum Viride - control
the heart's action - bring it down
Continuous nutrition - (P&I)

and stimulents but don't
 press them too far - Cincona
 infusion of bark - Wine
 ulceration of the epiglottis
 be scrupulous to watch stuffing of
 parts bed sores - Change the patient
 into bed every day change
 rooms if you can if sores do
 occur apply plasters

Helmholtz is a very trouble
 some symptom - draw a few ounces
 of blood cold bath is very good
 cold application to the head
 plug up the nostrils stop it
 if you can - Typhus & Typhoid
 fevers occur together in
 the same place and at
 the same time - we call one
 the 14 day and the other the
 21 day fever (H&I)

Gross - Dec. 10th

Removed a piece of Bone from
the nose of a boy that he
had slipped in - Christen bone
Poisoned. Wounds

Caused by the sting of
insects - bite of Reptiles

The sting of bees sometimes produce
death The constitutional symptoms
are depression feeling of faintness

Treatment alcohol Camphor
whiskey Should Constitutional
all symptoms occur given

Alcoholic Stimulents Salt and
water - Treatment of Snake

Bites Sustain the patient's
System by alcohol and (E&E)

Carbonate of ammonia
Give it freely - Scarcely
at once excise the part
cut it out very freely
let the wound be sucked
Apply a ligature above
Inject the Tincture of
Iodine - If Suppuration
occurs make free incision - Hydrophobia
persons of all ages are sub-
ject to it. The disease generally
becomes active at about
25 days to 9 months or
more - In the dog it is
less. The poison exists
in the saliva of the rabid
animal

Great dread of water or

117 117

117 7.

You must ~~st~~ pack
lint around the
spot - and as
soon as you have app-
lied it take winger
in sponge and apply
to neutralize the costic
or it will burn

Don't apply it hard very
light very light

The actual cautery may
be applied - Don't leave
lunar costic on more
than 4 or 5 seconds

In simple inflammation
Tincture of Iodine is
a very good remedy

L11

lent lunar costic is

but lunar costic. is
the thing - Felling of
the wound.

Gross Dec 14th Monday
Gunshot wounds -

The pain is very slight but
not always. Hemorrhage
is generally very slight.

It may be primary or second-
ary a person may perish
by shock - Trainees comes
on by soldiers laying on
the damp ground Erysipelas
is very common - Many
perish from secondary Erysipelas
Many die from pneumonia
Prognosis will vary from
instantaneous

Gross continued Monday 14
1669

Many die without reaction
on a wound of the lungs
Sometimes recover - a wound
of the brain never recover
~~upon~~ Treatment 1st allay
Shock 2nd Stop Hemorrhage
3rd Remove bone & form
bushies

1st allay Shock this
is done by cordials placed
in the recumbent posture
Cold water to be dashed
upon his face if he can
swallow give him cold
water & Stimulents

Wallace Dec 14th Monday 1868

Retroflexion of the uterus —
with the uterus bent backwards
Pass the finger up in the rectum
and push up the uterus

Protrusion uteri It is when
it comes out of the body
turning wrong side out —
i.e. the regina turns wrong
side out — Strong soreness
of the belly — If it depend
upon the neck you ~~may~~
must cure the inflammation
as fast as possible Give an
injection to clean out the
bowel 2 or 3 cold water
injection every day — You
can press it for momentary
relief if there is much pain
Inject ~~Sanctum~~

Wallace continued Monday

Take a Tallow candle and
push the uterus up or into
the rectum or take a
Culperator pass it up in
the vagina and blow
it up - it will sometimes
happen that you cant put
it up Treat retroflexion
the same as retroversion
Put in a pessary in sudden
cases of retroversion
dont stretch the vagina

#

Dickson Dec. 15th Tuesday

Typhus fever The patient
is generally taken with
head ache & a vacant
E 11

look - The heat of the
skin - soon becomes hot
 The skin is dry and harsh
 you have a sallied dull
 look. The eye has a glassy
 look. Yellowness mixed
 with redness -

examine the eye - a
 good many of the cases
 generally begin with nau-
 sea foul mouth not
 much pain but in
 the head - pain in
 the belly - Great febleness
 of pulse in many cases -

Culmen eruption is
 earlier in these cases

Dickson continued

The tongue undergoes many changes often clearing off becoming dry. The patient will put his tongue half way out and take it back when you ask him to don't appear to understand you - Sometimes the patient shows Nausea. You find Hiccup - the gland swelling - picking at objects in the air is a sign of death. Sometimes the urine will stop you must examine the bladder - 111 / 863

as a rule we can't
 find any change in
 the system after death.
 by examination — ^{sometimes} generally
 the brain is diseased
 or the heart — The stomach
 is sometimes found
 slightly disordered.
Treatment — "Hypochloric
 and Nutrition" — Bleed if the
 patient need it — cut the hair
 of the head an hour or cool
 water and put the feet in
 warm water — The Antimonial
 emetic is of very great
 service if the tongue continues
 creamy carry the dose to
 vomiting — Give Dover's
 powder

Laxative emetic every two
hours - combine a dose
of calomel determination
of the head must be
reduced or the patient
must die - Some stimulate
but you must feel you
way don't let your patient
struggle to death - Use bark
early in these ~~years~~ cases
change the bed every day
ventilate the room -
Spring the patient to
keep down the heat
of the body -

Spotted fever. Here
we have the same
601

difficulty that we
have in typhus
patients. Sometimes die
within 24 hours purpuric
spots occur. The treatment
is the same as the other
forms of Typhus and Typhoid
only more prompt

Gross Dec-15th Tuesday 1863
Gunshot wounds -
Shock it does not pass
away for some days some
times it depends on depression
of the nerves It is generally
cured by stimulence of
an alcoholic character

Hemorrhage Now is it
to be stop'd - tie the blood
vessel above and below
if it is a large vessel it
should be done as soon
as possible - if it is a small
vessel cold water will stop
it. Secondary hemorrhage
occurs from one week to
eight - apply a tourniquet
above the wound - it would
be well to plug the wound
with lint and close
if the bleeding is profuse
cut down to the artery
and tie it above and below
but it so happens that

we cannot find the
bleeding vessel

3^d to extract the ball
and all foreign substance
place the part in the
same position that it
was when it received
the injury and then
you can pass the probe
to the bottom of the
wound you can tell
when you touch it
by the sound having
found the bullet the next
thing is to remove it
this is done with the for-
ceps - The bullet must be
extracted as soon as possible
it acts as a foreign body

You would not search
for it in the brain
lung liver or spleen
let nature get rid of it
if it is in a joint remove
it If it is intirely in
the bone let it remain
Sometimes it is necessary
to use the trephine Splinters of
bone should be sedily removed
examine the patient
thoroughly and remove all
pieces of bone and
all foreign bodies
They will provok violent
inflammation and death

Hospital Dec. 16th Wednesday
Selenium Iunius

Give them a good Emetic and
warm bath - Magnesia with
a little anodyne Opium to quiet
if the fever is not pulse high
cup the back of the neck
Veratrum Verida Digitalis

Sometimes you have to give
Licker They are very survis
on the side where expectorant treatment
the patients do get well

You must treat patients according
to the case - Stimulate gradually
and give opium Give Veratrum
Verida 4 drops every 3 hours

Opium eaters have the same
Symptoms - You will find
it among women

You should be very careful how
you administer opii or Scaudum
Treatment Don't withdraw it
at once you must do it
gradually or you will
have Manapocha or nervis
irritability Allow fresh air
stimulents good diet
Nervonica is very good.

The liver becomes congested
Give May apple in very small
doses in 6 or 8 grs with muscov.

Agnew D.C. 16th Wednesday
Indolent Ulcers cured by compr
ession after the ulcer has healed
you must apply Starch
police and the following
prescription

Vital acid ~~27~~ 40 drops

Simple Linctus. ℥i

to be applide to the skin
to change the caractor of
the circulation —

2nd case. Ulcer on the
ankle use bromine
work it into all the
parts of the sore — You
must pain off the everted
edge so that the bromine
can come in contact
with living tissue

1 part of bromine to 13 parts
water — Gentle cathartics
Go chit warm water
dressing

3 Case Sore Eyes following the
excessive use of liquor - regulate
the habits Treatment Direct the
patient not forcibly to force
open the lids Soak them in
warm water - ointment

4 grains red precipitate
Some Seicate and a
little finely powdered
rubbed on the lids 2 or 3
times a day - regulate
the bowels - Citron ointment
is very good - Mercurial
ointment -

4 Case The man fell down
stairs Dec 13 - He has a very
bad ^{short} cough - pain in the
side

feels something grating together
systems of fractured ribs
The ribs are fractured The
4th and 10 apply a roller or
adhesive strips - The strips
should always run obliquely
strips about 2 in broad it is
necessary to control the
cough Give anodynes
every day a $\frac{1}{4}$ gr. of Morphia
5th Case Syphilis Secondary
affection Crozier Sublime
1 gr in 3 ounces of Sassafras
Dose 1 tablespoon full 3 times
a day at night Dover's powder
2 $\frac{1}{2}$ Rosell Scitls
1 gr. triter emetic for
plisie

Gross Clinic Dec. 16th 1863

1st Case - Young woman 25 years
blind in one eye caused by
Inflammation of the eye Happened
when she was 6 years old

2nd Case - (a Nigger) 8 one Eye
Received a blow on the top
of his head 3 years ~~old~~ ago
feels dizzy in his head - numbness
in the scalp - Disposition to fall
forwards - The only thing that
we can do is to get rid of the
existing Inflammation

Mine of Colchicum

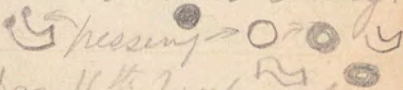

1 Epsom Salt

Sulf of Morphia

wash the forehead with hot
water with a little salt

3rd Case - Affection of the bladder
 Erytrophy of the bladder
 a hernia in each groin
 For ulcers and felling
 apply a cataplasm of lead
 and opii - Internally
 Mercury and opii - The best
 remedy is to cut them to
 the bone in felling -

Conjugal Hypertrichy
 of the tongue Gross umbreced
 Today The 16th Dec. Wednesday
 Next Case Hair lip -
 Dissect the lips up and raise
 the edges then detach the
 lip from the gums - Introduce
 a pin at the lower extremity

and then cut the higher
up. The child should be
two months old - cut the
lips with a pair of cissors;
be careful to get the lower
edges even leave the pins
in from 3 to 4 days
bind foot cut off the muscle
that holds and put on
the apparatus to straight-
ten them 
Wallace Dec. 16th Wednesday
On Pessery They should
be made of flexible matter
Some women can wear
any pessery at all on
the account of the tendency
of the vagina

Sometimes the only thing
that a woman can bear
is a piece of sponge
~~Sash~~ Sassa is a little
muslin bag filled with
Lammin or powdered
vase carb - dont put
it in if you can help it
dont leave them in any
longer than you can
help Sometimes pregnant
women have swelling of
the uterus by the blad-
der not being emptied
they cant pass their
water or they are pass-
ing water all the
time A comes by a
sudden jar, or falling

on the back Synt
are a ting of the
back The first
treatment

Gross - Dec. 17th Thursday {very
rainy

Gunshot wounds continued
Sometimes you must enlarge
the wound and examine it
in order to get rid of loose
pieces of bone - This may
be done by the fingers
with the aid of forceps
You may inject cold
water to wash out small
pieces of bone cut
off the sharp points of

off the sharp points of

103

Bone or they will
be picking the muscles
and blood vessels —
Then place the parts
in a relaxed position
a little elevated — Then
use cold water dressing
medicated with a
little op^r don't apply
any thing to the wound
like lint you may
apply a roller to support
the parts taking care that
you do not close the open-
ing so that it cannot
Discharge — Cold water
is the greates remedy
it is not to be used at
all times 75

But if the patient has
been shocked or diseased
previous to the wound
Then use warm water
or poultices - at the
beginning of the disease
Cold water afterwards
warm medicated with
alcohol - acetate of
lead opii -

Constitutional Treatment
It should be antiphlo-
gistic or if he has lost
blood milk punch nutri-
tious diet - for wound
fever you give Morphia
Tartrate of Antimony

we give it ~~off~~ to
 produce sleep, and
 to relieve pain if he
 is warm. Spruce the
 body with cold water
 if cold use warm water.
 We dilate the wound
 if there is supuration
 and no discharge
 you give the patient
 Morphine. Iodine in
 combination with
 nutria's diet.

Gun shot wounds in
 different parts of the
 body - of the lower
 extremities - Amputation ^{to}

Primary Amputation
is amputating at the
time of the injury —
Secondary Amputation
is amputating some
time ^{4 or 6 days} after the wound
You must amputate
in a healthy part
of the limb — when
the patient is in a
low state you must
bring up the patient
before the you operate
you must not wait
until there is inflammation
Always administer Chloroform
is a good stimulant

107
What are the cases
that demand amputation
Suppose the humerus bone
blood vessels and all are
injured you would amputate
immediately - ~~but~~ if the bone
is whole and one of the
large veins or artery
or principal nerve are
injured you will amputate
but there are exceptions
to all rules - if a large
joint is lacerated then
amputate or your
patient will perish
from pyemia typhoid
or sepsis

L. Gross continued
you cannot amputate
for injury of the hip
joint. — — — — —

Dickson Dec. 18th Friday
Catarrhal fever
with a large dose of
Opium we can abort
this fever — You must
guard your patient
for a few days —
The loss of a few ounces
of blood is very good
give an emetic and
a cathartic — warm
mustard poultice, and
warm application
strong infusion of

Back of the heart
and lungs and pleura
Gua. Sovers powder or
Sandalum to relieve
pain - Carbonate
of Ammonia and wine
has been used as stim
ulents. Porter Nervative
acid Arsinic as a tonic

Gross - Dec. 18th Friday 1868
The opening of entrance
of a ball is much
smaller than the opening

of exit -

Hemorrhage or wounded
arteries - They are ^{horizontal}
^{oblique} longitudinal
They contract the blood
coagulates with an
external clot and inter-
nal clot as the vessel
heals the clots are absorbed
and a closure of the
artery by its coats

It is much safer when
the artery is cut entirely
off than when it is
wounded The ligatures
come out by ulceration i.e.
off from arteries sometimes
it ~~is~~ is detached in
~~be~~ two or 3 days in the
smaller arteries

in the larger arteries
it may be ten or 12 days
if they do not come loose
take hold of them and
make a little friction
Compression Tournica
or compression. Sometimes
a wound may be plugged
Stiptics cold water
And cold air per sul-
phate of Iron
per chloride of Iron Alum
Creosote Sulphate of
Copper

Wallace Dec 18th Friday
on Obstetrics
- 18

Retroversion of the pregnant uterus Interference with the action and interference with the bladder. What would become of the uterus. The first thing to be done of is to examine her and put it back which is hard to do. The first thing to do is to empty the bladder which is sometimes very difficult. put your finger in up around the pubic arch and push the uterus back and pass the catheter up along the finger

Then put your patient
on her hands and knees
then you unload the
uterus of its weights
Then pass in two fingers
into the rectum and
press it up cautiously
and put one finger in
the vagina and get
your finger into the os
uteri and draw it down
Having replaced it
put the patient to
bed and keep her there
for a week or two —
but if you cannot
replace it then you

88

will have to produce
abortion - Next
Inversion of the
uterus - What is the
Cause it generally comes
on just after labor but
it may come on anytime
Caused by a Polypus
Caused by irregular
contraction

Hospital Sudlow Dec 17th Saturday
1st Case - Fracture of vertebra
Counter irritation fric-
tion to the limbs and
Nuxvomica - has a stinging
sensation the spine to
be rubbed with stricni-
ne ointment and
Stricnine internally

It comes by a fall
on the buttock—

Carefully examine the
spinal column—creeps
and leaches along the
spine—Take a towel
and dip it salt and
water and let it dry
and rub the parts with
it— a small weak blister
Then rub in a little.

Stricmarine ointment
Be careful about heel
sores use (crocin sublimed
and alcohol for heel sores)
Take a plant and cut
a hole into for the sore
18

to rest in) tell your
 patient how it is tell
 them that time must
 do more than the Dock.
 The nerves of motion are
 injured in these cases
 2nd case. Rheumatism
 also some pain over
 the region of the heart
 had him cup over the
 heart. The heart is very
 liable to be affected keep
 down the action of the heart
 with Scitram verura in 4
 drop doses - Bleed in some
 cases when the pulse runs high
 No blood drawn
 removed of the loquium

Nov. 4th 1863

77
 or Addresser Pleader
 the Pleader to stay on
 10 days this evening is
 as that is necessary
 Nov. 4th 1863

 Troop to draw off the
 at bridge - enter it
 guilty vote at the lower
 part of the Sermon
 must say still for a
 few hours after breakfast

Fractured Rib.
Short enough cannot
take a long breath
Inasmuch to prevent
the heart by a vessel

Fish-like spawning of the
" " " "

"I got Blue Magee

St 1/4 gr. Cornin

11. *Ferr*

Received Nov 4th 1868

Scudlow continued

Small doses of blue mass
and Dovers powder —
heavy condition of the
urine cup over the Kid-
neys pure liquor of
Potash in 20 drops
alkaline treatment
brachell salts mixtab
of Potash Dovers
powder at night &
very frequently we
have gout with it
then use Colchicum
solid of Potash in
combination is very
good where there is syphi-
tic taint. If it is in the
LL

Then apply a small blister to the part and then keep it open with morphia- make a liniment of gorse greens cod liver oil camphor Annonia and rub with it Iodine gorse greens cod liver oil and let the patient wear it then keep the patient in action -

St Agnew Dr. C. 19th Dec. Saturday
1st Case - An anteroposterior curve of the spine.

Two causes 1st Pott's disease is affected or Scrophulous disorders it is called Pott's disease of the spine

Treatment is recumbent
posture which is very
essential in the very
early part of the disease
you may apply blisters
and leeches

Constitutional remedies
nutritious diet

Cod liver oil Iodine
and a little Iron
2nd Case a woman - with a
tumor - Chronic abscess
Caused by a fall
Treatment consists in
making an incision
afterwards inject a
weak solution of
-rl

nitrate of silver

nitrate of Silver

3rd Case - Sore Eyes

Proff dont know what
is the diagnosis

4th Case - Sore Throat

The Tonsils are very much
enlarged you can relieve
the difficulty by Scarifica-
tion and then apply cooling
and if very bad cut
them off -

Case - 4th Conjunctivis
fell on a corn stalk
and put one eye out
the other sympathises

Apply nitrate of Silver
Eight grs. to the ounce
counter irritation by a blister
on the temple

Wallace Cal. 19th Dec Saturday
125 case Corria
"Jerking of and Twitching
of the arm - a young
woman - Active friction
on the surface and
tonics - Fowler's solu-
tion 15 drops M A & Night
in a little water - a salt
bath friction all over
the body

Ext Myrronice 20 gr
Divid into 20 pills
1 Morn. Morn and night
if it disturbs stop a
few days and begin
again

2nd Case pain in
the left side pain in
the back Scurvica
Abundantly poor ap-
te been so since her
last delivery

3rd Case - Bleeding of the Lungs
Sound of the heart more
distinctly than it should
The nails rounded
The upper portion of the
lungs are very much
diseased night sweats
had a hemorrhage and
then he felt better - Cough
was better - had hectic fever
The hemorrhage breaks up
The hectic fever has a
great deal of mucus in
the lungs.

give a moderate amount
of Opium to stop the cough
good diet active exercise

Brandy or whiskey
Eat Nuxvomica 3 or 4
powder Opium 6 gr
M. Sulphate of Zinc 1/2
Direct
1 M. - N. - And Night

4th Case Tisis

Has a bad cough in the
morning when he gets up
takes black drop for the
cough - the sound seems
as if it was right in
ear give Whiskey or
brandy - 1/2

make them grow
the sexual appetite
is increased (—) (—)

Dickson 21st Dec. Monday

On the circulation of
the blood - The heart is
about the size of the man's
fist weighs about 9 ounces

The heart has two sounds
the first is longer and
dull the second is short

and sharp Heart Disease

There is uneasy feeling about

the region of the heart

feels faint when going

up Starts the tongue

has a dark color

L9

You find Heart Disease
connected with Pleura
and Rheumatism

There is Dull pain about
the region of the heart
violent beating of the
heart Cough heat of
Skin head ache Thirst
Nausea Delirium The
patient does not like
to lay down flat
wants the head raised
Pericarditis is more
easily Diagnosticated
Generally connected
with Rheumatism

Pericarditis usually shows
itself by sharp pain

by examining by auscultation you will hear a rough sound generally but a short time - and then the sound of the heart becomes very dull this owing to effusion in the heart - the patient does not want to lie down a little hacking cough, the rough sound may return which is favorable - There is some edema the patient cannot ascend a flight

Emulo carditis gives

you a dull sound
the patient complains
of heavy pain less
fervor less uneasiness
If the substance of
the heart is diseased
you may have empu-
tion of the heart
The heart has been
found filled with pus
looks black you
will find it covered
with a cinous mem-
brane sometimes
you will find little
warts on the valves
sometimes they become
adherent and thereby
stop the circulation

The treatment of
all these diseases
are the same. The
leincet has been
used in all these cases
so I think it is very
essensial I would
repeat if the same
symptoms occur—
Antimonialls are
much in use verbatim
veranda leech the region
of the heart counter
irritation reduce
the diet very much
for the first few days

Gross - 21 Dec - Monday
 Amputation in gun
 shot wounds - we should
 amputate, some ways
 from the injury or
 the inflammation
 will be very severe
 Gunshot and other wounds
 of the scalp where the
 wound is large shave
 the hair off and apply
 the Suture they are
 apt to be followed by
 more or less disturbance
 of the brain neuralgia

1863 1863 K /

Wallace 21st Dec. Monday

Polyps of the uterus

Polypus Tumors are but
slightly vascular

Bleeding from the womb
is one of the symptoms of
Polypus have just as much
hemorrhage from a small
one as a large one—

The uterus grows as the
Polypus grows

Symptoms Leucorrhoea

Hemorrhage You must
make an examination
sometimes the blood
retained in the uterus—
Us—

Treatment Away with
 the Disease You may
 have to keep your
 patient up with good
 diet strong astringent
 injections of Alum
 opii or plug up the
 vagina to stop the
 blood and wait a-
 while untill you
 can get to it then
 take your Scissors
 and cut it off as
 close as you can
 if there is any left
 it will shrink away
 If there is any humor
 here you must touch
 it with linnor coctie

or you can apply
a ligature to the polypus
they are very soft which
arrests the circulation
if it get nasty you
can take a syringe
it out - you will have
to catheterize your patient
after the tumor is
off wash the part
with water medica-
ted chloride of Soda
or a little Soap
if you find one in
labor put a ligature
on and draw it as
tight as you can

and cut it off
 leave the ligation on
 or take an eecygar
 and crush it off and
 you will have no
 hemorrhage

Colly flower ex cressnae
 Springing from the
 or uteri Sometimes
 they grow very rapidly
 sometimes very slowly
 it is a largely vascu-
 lar body with small
 blood vessels

1863-1863-1863 1863

Gross 22nd Dec Tuesday.
Injuries of the Scalp
and Brain - Triapism

Wallace Cl. 23rd Dec. Wednesday
1st Case - ~~Diaphesis~~ Has a
tendency to vomiting - - -

He has a lump in the
Abdomen we think it
is disease of the pancreas
which will run into cancer
Almost everything he
eats distresses him
all you can do is to
palliate the condition
of his bowels should
be looked after. Give
mucry to wake up the
Stomach or Rhubarb - Also

Stomach or Rheumatism - Abdo

141

Subnitrate of bismuth
Give a small amount
of concentrated food, you
can apply cups Blisters
to palliate the disease
For Asma

R. Squills

Spica

Tinct. Lobelia Begin 30th every day

Use Croton Oil on

the Surface

Wallace, 23rd Dec. Wednesday

Colly flower excrement
is uterine - or vagina
disease Treatment -

Remove it by the Knife
or the ligature having
removed it - bring

your cystic down
upon it. Cystic
Potash or Acid
Nitrate of Mercury
and Lunar Cystic
good Supporting
But Quinine the
Vermica Chloride of
Iron -

Tumors of the Uterus
Cystic Tumors - But
you may have Solid
or Solid and Cystic
We find them at all
ages The greater majority
these tumors are Cystic
The surface is smooth

If you tap them
you may have Hemorrhage
you may have transfused
a large vein —

Adhesions will exist
between the cyst and
the peritoneal or intestines.
They sometimes
contain hair bones
and fat.

Sinnicafuga

Nuxvomica & Stramonium
to wake up the morbid
system

After you have produced the affect give Anodynes -

Surg. Agnew - 30 Dec -
1st Case - Cancer of the face nose gone some of the lips - Girl 14 years old Treatment vib on a little sweet liver oil and constitutional treatment it cannot be cured -

2nd Case - a man who was wounded at the battle of Cedar Mountain Compound fracture of the leg below the knee

The wound has never
heald - There is necrosis
of the bone

3^d Case - Enlargement
in front of the Thyroid
cartilage - It is a boil
Treatment - Open it and
apply warm water
dressing a few thick
pieces of muslin
wring out of warm
water with oiled silk
over it fastened with
adhesive plaster

4th Case - Black woman
with a cataract in
her eye

5th Case - Old man
with stricture of
the urethra

Treatment Incision
Dilatation

If there is pain after
the operation place
the patient in a recum-
bent posture and
dozers powder in 10 or
12 gr. Doses -

Wallace - Dec 30th Med.
Epilepsy ^{fits} in a little
girl pain in the
stomach Throws up
her food - Cant express
any opinion - Bad case

Dropsy - A collection
of serous fluid
1st Serous Dropsy
2nd Fibrous Dropsy
It is very difficult to
decide between dropsy
and Inflammation
The urine is scanty
and high colored
There is Albumin in
the urine the stomach
is irritated by its own
contents there is swelling
of the feet

Today is a snowy
day

LE

Monday 157

(Monday) 157

Wallace Jan. 4th 1864

Menstrualgia to profuse
flow of the menses
Sexual excess often
produces it The causes
are various - Examine
the cause first -

first Keep your patient
still - you will have
excited pulse - Take down
the pulse first -

Give and Tinct of
Chloride of Iron -

If it come on when
the flow does you can
apply cold to the pelvis
Dry cups all around
the pelvis are very good

Bright's Disease of the Kidneys
or Disease of the Liver is sometimes
the cause of the Nephralgia

If it depend on uterine
excitement you must
treat it by rest and
apply cups or leeches
If it is dependant on
to excess of sexual excite-
ment stop the excess. —

If the man is too lam-
buncious - give him
Laster emetic and
water 2 grs. to the ounce
If there is ulceration
of the cervix uteri you
must apply caustic
to the parts

Chlorosis

— 58

159

Symptoms greenish
tinge of the face
brown around
the eyes Disordered
Respiration to frequent
palpitation of the heart
Dull pain about
the chest - Depressed
appetite pain about
the abdomen Disordered
of the Kidney - flatulence
Diarrhoeal pain in the
limbs feet swell
face swelled in the
morning Cornea will
set in Sometimes
Strange will be the
Sight and Sound

you must look
after the uterus and
anemia Give plenty
of Iron good exercise
plenty of fresh air
gentle stimulation
animal diet

In Diarrhea put in
a little opium and
caphor - Aloes oil Tamey
and Iron - active
friction on the
surface with salt
towel

Dickson Jan 5th 1864 Tuesday
Dropsy It is hard to
remove the cause
you can remove the fluid

68
you can remove the fluid

quite easily

161

The whole treatment
of dropsy is indirect
after drawing off the
fluid you must stop
its reforming if you
give cathartics your
patient will die soon
from the drain you
thus affect you must
stop its forming -

The lancet is very good
Blisters also opium
at times act as diuretics
Digitals if adapted
to the case is good -

Regard the condition
of your patient and
treat accordingly
66

Dilating

Given in from
1/6 to 1/10 of grain every hour
Cream of Tartar is very
good - Gamboge
given in solution with
Nitric Ether

Nitrate of Potash

Turpentine Juniper berries
Cantharidies

{ You must give water
Dry diet -

Parsley tea is very
good to act on the
Kidneys

Diuretics act better
when combined

You must be careful
not to continue to

not to continue to

long -

Colchicum combined
with Squill is very
good when there is gout
or Rheumatism with
dropsy - Make incision
with a lancet

Chick - Lamination of

Adhesion to the vessels &

Chronic Inflammation

Remittent - Intermittent -

motion at - once

Aggravated heat - shivering in the

Diastolic

in Sphygmomanometer

firmness of the vessels

Force Sphygmomanometer No 3

Make a grate many
punctures on the sole
of the foot and ankles

How shall we prevent
the return of the fluid
give the patient fresh
air exercise give
Iron and bark - The
Infusion of Symplocos
is very good Snake root
Potash

Mercurials have been
very much used
around the belly with
Digitalis -

Aschietis you have
to distinguish it from
(56)

pregnancy be very
careful in diagnosis
you will find the
mesenteric glands enlarged
the patient vomits bile
in the morning feels
dizzy has head ache
the urine is scant
and high colored
examine carefully into
the history of the patient
previous to the complaint
you will find the
liver affected

1864 " 1864 " 1864 " 1864 "

2 January

Dre/son Jan 7th / 1864 Thursday

Aschutis You will have
visceral disorder sooner
or later - Mercurials are
^{not} well born in dropsy. If you
do employ them do it carefully
If the mercurial fever be
produced stop the mercury
you should always have
your finger on the pulse while
the water is flowing and if
the pulse falls stop the flow
The operation is generally
well born - You can use
stimulating fluids may
be injected in alcohol or
Sodium

(L 6)

^{Hydrothorax}
Hydrocephalus or dropsy
 of the chest - It is the result
 of Pleuratic Disease - or cardiac
 disease you will be expected
 to make correct diagnosis
 you must change the position
 of the patient and percuss and
 auscultate and you
 can tell if you are careful
 you will find that the
 affected side does not
 rise and fall in inspira-
 tion as the other side
 There is a spastic condi-
 tion - The patient suffers
 ongoing to sleep - The
 patient wants on the least
 exertion the urine is high colored

Irregular pulse - palpitation
of the heart Sometimes the heart
is out of its place, pushed
by the fluid -

Treatment, - Diuretics are
the prominent treatment
In many cases you will
find benefit from mer-
cury - Tobacco - Cream of
Tartar - In some cases the
cantharid is very good you
must judge by the consti-
tution Opium must be
freely used - Blister
should be applied
extensively to the chest
The Thorax may be
(5 to)

opened and draw
off the fluid.

Hydrocephalus 
Fluid in

the Brain

Gross Jan 7th 1844 Thursday

Treatment of fracture

1st Set the fracture by
extension and counter
extension and manipulation

The extension should
be made in the direction
of the injury or length
of the bone be careful
and do it moderately
If the fracture is of the
inferior extremity
the patient must be
confined to bed

Drum board
Booth Bifidus board
Saddle board is very
good for fractures
of the jaw or arms
but, it should be put
into Boiling water
to soften it and then
mold it to suit the part
you must commence the
roll at the end of the
limb you must make
allowance for swelling
apply it loosely if it
gets to tight that at
any place you must
remove it use the
scissors to slacken it
sometimes the bandage
is wet in wet weather

is well in the water

171

After we have got
the ends of the bones
together we endeavor
to keep them there
The dressing should
not be removed - Visit
your patient often -
During the first few
days the patient will
have fever this must
be attended to give
antimonials
attended to the urine
the diet must attended
to - after a few days
you must make passive
motion to keep ancolosis
from the joint

When you take off
the dressing you must
wash the heart with
castile soap and
bathed in Camphor
Complicated fracture
is one where there is a
wound of the soft part
Should there be a Dislocation
reduce the dislocation
first and then set the
fracture Should a joint
be laid open or the
main artery torn off
you should be amputated
Sometimes the bones will not
unite with the best treatment
D to

or it is not solid
then you may break
it again

Individual fractures
fracture of the nose

They may be simple
or they may be complicated
Deformity is not always
pleasant. Introduce
a female Catheter into
the nose and elevate
the fragments and
make them hold their
place and apply adhesive
strips across if the hemor-
rhage does not stop you
must plug the nose

7 1864

if the malar bone be
broken you should if you
cannot get it back in
any other way cut down
upon it and replace it
by making levers to
raise it.

The lower jaw is liable
to be broken at different
parts.

Mitchell Jan 1864

Hydrocephalus

cold to the head

Mercury -

Purgatives -

Gross - Jan. 8th 1864 Friday
In fractures you must
subdue Inflammation
and see to the bladder
The lower jaw may
be fractured at different
parts The symptoms
will vary according to
the injury - there will
be more or less deformi-
ty - Care should be taken
to keep the jaw in close
contact with the upper
or they may be held
together by silver wire
around the teeth
or by a ^{past board} (bineters board)
splint. (51)

Fracture of the Humerus Bone is occasionally met with -

Fracture of the Cervical
The fracture is generally oblique - The symptoms are characteristic - The patient grasps the arm at the elbow and holds the body at one side the Shoulder is sunk downwards and inwards The patient is generally unable to raise his hand to his mouth The fracture is adjusted by pushing the Shoulder upwards outward and backwards (71)

The arm should be
flexed so that the hand
is on the Coracel Shoulder
and then secure it by
adhesive Strips

You need not remove
the dressing more than
once generally - It is
not necessary to introd-
uce a cushion into
the axilla = ~~ax~~ =

In spite of all you can
do there will be more or
less deformity

Fracture of the Sternum
^{ribs} ^{fracture of ribs}

There may be or may
not be Displacement
The patient ^{ET} will

have trouble in
breathing

181

You must apply a
compress and confine
it by adhesive strips
they must extend once
and a half around
the chest or a roller
you must not pay any
attention to the air in
the pleura it will be
absorbed.

(61)

Fracture of The Scapula

Wallace Jan. 8th 1864
Generation

A gush of Blood may
wash away the ovine
fecundation may
take place in the fallo-
pian tube or in the
uterus It is not formed
in the uterus untill
about 12 days.

Compulsive ovulation
is brought on by
Sexual temptation

Conception is not
pregnancy -

(11)

Pregnancy is the development of the ovum where may conception take place—

Pregnancy may take place in the ovary or in the fallopian tube. True pregnancy is where the ovum has fixed itself inside of the uterus.

The child is not the cause only of the enlargement of the womb. You will find one end of the womb higher up than the other.

OT (OT)

the neck of the uterus
is not more than an
inch and a half two
weeks prior to ~~the~~ labor
you will find the
pregnant uterus
retroverted

you will find
it tilted a little
to the right
at the end of
three months and
a half the uterus
is out of the pelvis
you can feel it
at the top of the
pubis (b)

by the 5th month
it will be up to
the navel.

It continues to grow
untill about 8 $\frac{1}{2}$ months
and then
it appears to get
smaller it sinks
down.

Why does it fall
It jams the fetus
down into the
excavation of the
pelvis - Sometimes
it flattens out
transversely
It is a sign that

She will be pregnant
in 12 or 14 days -
But it does not
always sink
some women
carry the child
high but it is
not a general rule
